

The Other Side Introduced species

The rabbit-proof fence was built to try to stop the spread of rabbits after they had been introduced to Australia. Many other animals and plants were brought into Australia and later became pests. Find out about them.

Foxes

When were they introduced to Australia?

Why were they brought here?

How far did they spread?

What impact did they have on the environment?

Cane toads

When were they introduced to Australia?

Why were they brought here?

How far did they spread?
