PART FOUR: AUDITED FINANCIAL STATEMENTS

NATIONAL MUSEUM OF AUSTRALIA ANNUAL REPORT 09-10

INDEPENDENT AUDITOR'S REPORT

To the Minister for Environment Protection, Heritage and the Arts

Scope

I have audited the accompanying financial statements of the National Museum of Australia for the year ended 30 June 2010, which comprise: a Statement by the Council, Director and Chief Finance Officer; Statement of Comprehensive Income; Balance Sheet; Statement of Changes in Equity; Cash Flow Statement; Schedule of Commitments; Schedule of Asset Additions; and Notes to and forming part of the Financial Statements, including a Summary of Significant Accounting Policies.

The Council Members' Responsibility for the Financial Statements

The Council Members are responsible for the preparation and fair presentation of the financial statements in accordance with the Finance Minister's Orders made under the *Commonwealth Authorities and Companies Act 1997*, including the Australian Accounting Standards (which include the Australian Accounting Interpretations). This responsibility includes establishing and maintaining internal controls relevant to the preparation and fair presentation of the financial statements that are free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

Auditor's Responsibility

My responsibility is to express an opinion on the financial statements based on my audit. I have conducted my audit in accordance with the Australian National Audit Office Auditing Standards, which incorporate the Australian Auditing Standards. These auditing standards require that I comply with relevant ethical requirements relating to audit engagements and plan and perform the audit to obtain reasonable assurance whether the financial statements are free from material misstatement.

> GPO Box 707 CANBERRA ACT 2601 19 National Circuil BARTON ACT Phone (02) 6203 7300 Fax (02) 6203 7777

82

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the National Museum of Australia's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the National Museum of Australia's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the Council Members, as well as evaluating the overall presentation of the financial statements.

I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my audit opinion.

Independence

In conducting the audit, I have followed the independence requirements of the Australian National Audit Office, which incorporate the requirements of the Australian accounting profession.

Auditor's Opinion

In my opinion, the financial statements of the National Museum of Australia:

- (a) have been prepared in accordance with the Finance Minister's Orders made under the Commonwealth Authorities and Companies Act 1997, including the Australian Accounting Standards; and
- (b) give a true and fair view of the matters required by the Finance Minister's Orders including the National Museum of Australia's financial position as at 30 June 2010 and its financial performance and cash flows for the year then ended.

Australian National Audit Office

Peter Kerr A/Executive Director Delegate of the Auditor-General Canberra 30 July 2010

National Museum of Australia

STATEMENT BY THE COUNCIL, DIRECTOR AND CHIEF FINANCE OFFICER

In our opinion, the attached financial statements for the year ended 30 June 2010 are based on properly maintained financial records and give a true and fair view of the matters required by the Finance Minister's Orders made under the *Commonwealth Authorities and Companies Act 1997*, as amended.

In our opinion, at the date of this statement, there are reasonable grounds to believe that the Museum will be able to pay its debts as and when they become due and payable.

This statement is made in accordance with a resolution of the Council.

From one to five years	1,718	4,021
Total other commitments	5,772	8,800
Net Commitments by maturity	11,776	12,792

NB: Commitments are GST inclusive where relevant.

The nature of capital commitments are contracts for acquisition of plant and equipment and future exhibitions.

The nature of other commitments are expenditure for service contracts and operating leases for motor vehicles, accommodation, warehouses.

The Museum enters into commitments as a lessee for motor vehicles, office accommodation and warehouses. Office accommodation and warehouses are subject to annual increases in according with upwards movements in the Consumer Price Index. Leases may be renewed for up to five years at the Museum's option, following a once-off adjustment of rentals to current market levels. There are no renewal or purchase options available to the Museum for motor vehicle leases. There are no contingent rentals for motor vehicles.

Notes to and forming part of the financial statements

Note 1: Summary of Significant Accounting Policies

1.1 Objective of the National Museum of Australia

The National Museum of Australia is an Australian Government controlled entity. The objective of the National Museum of Australia is to promote an understanding of Australia's history and an awareness of future possibilities by:

- developing, preserving and exhibiting a significant collection;
- taking a leadership role in research and scholarship;
- engaging and providing access for audiences nationally and internationally; and
- delivering innovative programs.

The National Museum of Australia is structured to meet a single outcome:

Outcome 1: Increased awareness and understanding of Australia's history and culture by managing the National Museum's collections and providing access through public programs and exhibitions.

The continued existence of the National Museum of Australia in its present form and with its present programs is dependent on Government policy and on continuing funding by Parliament for the National Museum of Australia's administration and programs.

1.2 Basis of Preparation of the Financial Statements

The financial statements are required by clause 1(b) of Schedule 1 to the *Commonwealth Authorities and Companies Act* 1997 and are general purpose financial statements.

The financial statements have been prepared in accordance with:

- Finance Minister's Orders (or FMO) for reporting periods ending on or after 1 July 2009; and
- Australian Accounting Standards and Interpretations issued by the Australian Accounting Standards Board (AASB) that apply for the reporting period.

The financial statements have been prepared on an accrual basis and in accordance with historical cost convention, except for certain assets and liabilities at fair value. Except where stated, no allowance is made for the effect of changing prices on the results or the financial position.

The financial statements are presented in Australian dollars and values are rounded to the nearest thousand dollars unless otherwise specified.

Unless an alternative treatment is specifically required by an accounting standard or the FMO, assets and liabilities are recognised in the balance sheet when and only when it is probable that future economic benefits will flow to the entity or a future sacrifice of economic benefits will be required and the amounts of the assets or liabilities can be reliably measured. However, assets and liabilities arising under Agreements Equally Proportionately Unperformed are not recognised unless required by an accounting standard. Liabilities and assets that are unrecognised are reported in the schedule of commitments or the schedule of contingencies.

Unless alternative treatment is specifically required by an accounting standard, income and expenses are recognised in the statement of comprehensive income when, and only when, the flow, consumption or loss of economic benefits has occurred and can be reliably measured.

1.3 Significant Accounting Judgements and Estimates

In the process of applying the accounting policies listed in this note, the National Museum of Australia has made the following judgements that have the most significant impact on the amounts recorded in the financial statements:

• The fair value of land has been taken to be the market value as determined by an independent valuer.

• The fair value of buildings has been taken to be the depreciated replacement cost as determined by an independent valuer. The Museum's main building is purpose built and may in fact realise more or less in the market.

• The fair value of heritage and cultural assets has been taken to be the market value of similar heritage and cultural assets as determined by an independent valuer. In some instances, the sale of the heritage and cultural assets may in fact realise more or less in the market.

No accounting assumptions or estimates have been identified that have a significant risk of causing a material adjustment to carrying amounts of assets and liabilities within the next accounting period.

92

1.4 New Australian Accounting Standards

Adoption of New Australian Accounting Standard Requirements

No accounting standard has been adopted earlier than the application date as stated in the standard. Of the new standards, revised or amended standards or interpretations that were issued prior to the signing of the statement by the directors, chief executive and chief financial officer, that are applicable to the current reporting period, none had a material financial impact on the Museum.

Future Australian Accounting Standard Requirements

Of the new standards, revised or amended standards or interpretations issued by the Australian Accounting Standards Board prior to the signing of the statement by the directors, chief executive and chief financial officer, none are expected to have a material financial impact on future reporting periods of the Museum, when effective.

1.5 Revenue

Revenue from the sale of goods is recognised when:

- the risks and rewards of ownership have been transferred to the buyer;
- the authority retains no managerial involvement or effective control over the goods;
- the revenue and transaction costs incurred can be reliably measured; and
- it is probable that the economic benefits associated with the transaction will flow to the entity.

Revenue from rendering of services is recognised by reference to the stage of completion of contracts at the reporting date. The revenue is recognised when:

- the amount of revenue, stage of completion and transaction costs incurred can be reliably measured; and
- the probable economic benefits associated with the transaction will flow to the entity.

The stage of completion of contracts at the reporting date is determined by reference to the proportion that costs incurred to date bear to the estimated total costs of the transaction.

Receivables for goods and services, which have 30 day terms, are recognised at the nominal amounts due less any impairment allowance account. Collectability of debts is reviewed as at end of reporting period. Allowances are made when collectability of the debt is no longer probable.

Interest revenue is recognised using the effective interest method as set out in AASB 139 Financial Instruments: Recognition and Measurement.

Resources Received Free of Charge

Resources received free of charge are recognised as revenue when, and only when, a fair value can be reliably determined and the services would have been purchased if they had not been donated. Use of those resources is recognised as an expense.

Resources received free of charge are recorded as either revenue or gains depending on their nature.

Revenue from Government

Funding received or receivable from Department of the Environment, Water, Heritage and the Arts (appropriated to DEWHA as a CAC Act body payment item for payment to the National Museum of Australia) is recognised as Revenue from Government unless they are in the nature of an equity injection or a loan.

1.6 Gains

Sale of Assets

Gains from disposal of assets are recognised when control of the asset has passed to the buyer.

1.7 Transactions with the Government as Owner

Equity Injections

Amounts that are designated as equity injections for a year are recognised directly in contributed equity in that year.

1.8 Employee Benefits

Liabilities for short-term employee benefits (as defined in AASB 119) and termination benefits due within twelve months of the end of reporting period are measured at their nominal amounts.

The nominal amount is calculated with regard to the rates expected to be paid on settlement of the liability.

Other long-term employee benefits are measured as net total of the present value of the defined benefit obligation at the end of the reporting period minus the fair value at the end of the reporting period of plan assets (if any) out of which the obligations are to be settled directly.

Leave

The liability for employee benefits includes provision for annual leave and long service leave. No provision has been made for sick leave as all sick leave is non-vesting and the average sick leave taken in future years by employees of the National Museum of Australia is estimated to be less than the annual entitlement for sick leave.

The leave liabilities are calculated on the basis of employees' remuneration at the estimated salary rates that will applied at the time the leave is taken, including the National Museum of Australia's employer superannuation contribution rates to the extent that the leave is likely to be taken during service rather than paid out on termination.

The liability for long service leave has been determined in accordance with the shorthand method detailed in Division 43 of the Finance Minister's Orders. The estimate of the present value of the liability takes into account attrition rates and pay increases through promotion and inflation.

Separation and Redundancy

Provision is made for separation and redundancy benefit payments. The National Museum of Australia recognises a provision for termination when it has developed a detailed formal plan for the terminations and has informed those employees affected that it will carry out the terminations.

Superannuation

Staff of the National Museum of Australia are members of the Commonwealth Superannuation Scheme (CSS), the Public Sector Superannuation Scheme (PSS), the PSS accumulation plan (PSSap) or other superannuation schemes.

The CSS and PSS are defined benefit schemes for the Australian Government. All other superannuation schemes are defined contribution schemes.

The liability for defined benefits is recognised in the financial statements of the Australian Government and is settled by the Australian Government in due course. This liability is reported by the Department of Finance and Deregulation as an administered item.

The National Museum of Australia makes employer contributions to the employee superannuation schemes at rates determined by an actuary to be sufficient to meet the current cost to the Government of the superannuation entitlements of the Museum's employees. The National Museum of Australia accounts for the contributions as if they were contributions to defined contribution plans.

The liability for superannuation recognised as at 30 June represents outstanding contributions for the final fortnight of the year.

1.9 Leases

Operating lease payments are expensed on a straight-line basis which is representative of the pattern of benefits derived from the leased assets. The National Museum of Australia has no finance leases.

1.10 Cash

Cash and cash equivalents includes cash on hand and demand deposits in bank accounts with an original maturity of 3 months or less that are readily convertible to known amounts of cash and subject to insignificant risk of changes in value. Cash is recognised at its nominal amount.

1.11 Financial Assets

The National Museum of Australia classifies its financial assets in the following categories:

- · held-to-maturity investments; and
- loans and receivables.

The classification depends on the nature and purpose of the financial assets and is determined at the time of initial recognition.

Financial assets are recognised and derecognised upon trade date.

Effective Interest Method

The effective interest method is a method of calculating the amortised cost of a financial asset and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset, or, where appropriate, a shorter period.

Income is recognised on an effective interest rate basis except for financial assets that are recognised at fair value through profit or loss.

Held-to-Maturity Investments

Non-derivative financial assets with fixed or determinable payments and fixed maturity dates that the group has the positive intent and ability to hold to maturity are classified as held-to-maturity investments. Held-to-maturity investments are recorded at amortised cost using the effective interest method less impairment, with revenue recognised on an effective yield basis.

Loans and Receivables

Trade receivables, loans and other receivables that have fixed or determinable payments that are not quoted in an active market are classified as 'loans and receivables'. Loans and receivables are measured at amortised cost using the effective interest method less impairment. Interest is recognised by applying the effective interest rate.

Impairment of Financial Assets

Financial assets are assessed for impairment at end of each reporting periods.

• *Financial assets held at amortised cost* - if there is objective evidence that an impairment loss has been incurred for loans and receivables or held to maturity investments held at amortised cost, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the asset's original effective interest rate. The carrying amount is reduced by way of an allowance account. The loss is recognised in the statement of comprehensive income.

1.12 Financial Liabilities

Financial liabilities are classified as other financial liabilities.

Financial liabilities are recognised and derecognised upon trade date.

Other Financial Liabilities

Other financial liabilities, including borrowings, are initially measured at fair value, net of transaction costs.

Other financial liabilities are subsequently measured at amortised cost using the effective interest method, with interest expense recognised on an effective yield basis.

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments through the expected life of the financial liability, or, where appropriate, a shorter period.

Supplier and other payables are recognised at amortised cost. Liabilities are recognised to the extent that the goods or services have been received (and irrespective of having been invoiced).

1.13 Contingent Liabilities and Contingent Assets

Contingent liabilities and contingent assets are not recognised in the balance sheet but are reported in the relevant schedules and notes. They may arise from uncertainty as to the existence of a liability or asset or represent an asset or liability in respect of which the amount cannot be reliably measured. Contingent assets are disclosed when settlement is probable but not virtually certain and contingent liabilities are disclosed when settlement is greater than remote.

The National Museum of Australia had no quantifiable, unquantifiable or significant remote contingencies in 2009-10 and 2008-09.

1.14 Acquisition of Assets

Assets are recorded at cost on acquisition except as stated below. The cost of acquisition includes the fair value of assets transferred in exchange and liabilities undertaken. Financial assets are initially measured at their fair value plus transaction costs where appropriate.

Assets acquired at no cost, or for nominal consideration, are initially recognised as assets and income at their fair value at the date of acquisition, unless acquired as a consequence of restructuring of administrative arrangements. In the latter case, assets are initially recognised as contributions by owners at the amounts at which they were recognised in the transferor's accounts immediately prior to the restructuring.

96

1.15 Property, Plant and Equipment

Asset Recognition Threshold

Purchases of property, plant and equipment are recognised initially at cost in the balance sheet, except for purchases costing less than \$2,000, which are expensed in the year of acquisition (other than where they form part of a group of similar items which are significant in total or are heritage and cultural assets).

Revaluations

Fair values for each class of asset are determined as shown below:

Asset Class	Fair value measured at
Land	Market selling price
Buildings	Depreciated replacement cost
Infrastructure, plant and equipment	Market selling price
Heritage and cultural assets	Market selling price

Following initial recognition at cost, property plant and equipment are carried at fair value less subsequent accumulated depreciation and accumulated impairment losses. Valuations are conducted with sufficient frequency to ensure that the carrying amounts of assets do not differ materially from the assets' fair values as at the reporting date. The regularity of independent valuations depends upon the volatility of movements in market values for the relevant assets.

Revaluation adjustments are made on a class basis. Any revaluation increment is credited to equity under the heading of asset revaluation reserve except to the extent that it reverses a previous revaluation decrement of the same asset class that was previously recognised in the surplus/deficit. Revaluation decrements for a class of assets are recognised directly in the surplus/deficit except to the extent that they reverse a previous revaluation increment for that class.

Any accumulated depreciation as at the revaluation date is eliminated against the gross carrying amount of the asset and the asset restated to the revalued amount.

Depreciation

Depreciable property, plant and equipment assets are written-off to their estimated residual values over their estimated useful lives to the National Museum of Australia using, in all cases, the straight-line method of depreciation.

Depreciation rates (useful lives), residual values and methods are reviewed at each reporting date and necessary adjustments are recognised in the current, or current and future reporting periods, as appropriate.

Depreciation rates applying to each class of depreciable asset are based on the following useful lives:

	2010	2009
Buildings on freehold land	100 years	100 years
Leasehold improvements	Lease term	Lease term
Plant and Equipment	4 to 100 years	4 to 100 years
Heritage and cultural assets	50 to 5,000 years	50 to 5,000 years

The National Museum of Australia has items of property, plant and equipment, that are heritage and cultural assets, that have limited useful lives and are depreciated.

Notes to and forming part of the financial statements

Impairment

All assets were assessed for impairment at 30 June 2010. Where indications of impairment exist, the asset's recoverable amount is estimated and an impairment adjustment made if the asset's recoverable amount is less than its carrying amount.

The recoverable amount of an asset is the higher of its fair value less costs to sell and its value in use. Value in use is the present value of the future cash flows expected to be derived from the asset. Where the future economic benefit of an asset is not primarily dependent on the asset's ability to generate future cash flows, and the asset would be replaced if the National Museum of Australia were deprived of the asset, its value in use is taken to be its depreciated replacement cost.

Derecognition

An item of property, plant and equipment is derecognised upon disposal or when no further future economic benefits are expected from its use or disposal.

1.16 Intangibles

The National Museum of Australia's intangibles comprise internally developed multimedia and purchased computer software. There is no software developed for internal use. These assets are carried at cost less accumulated amortisation and accumulated impairment losses.

Software is amortised on a straight-line basis over its anticipated useful life. The useful lives of the National Museum of Australia's software are 4 to 8 years (2008-09: 4 to 15 years).

All software assets were assessed for indications of impairment as at 30 June 2010.

1.17 Inventories

Inventories held for sale are valued at the lower of cost and net realisable value.

Costs incurred in bringing each item of inventory to its present location and condition are assigned as follows:

• finished goods and work-in-progress – cost of direct materials and labour plus attributable costs that can be allocated on a reasonable basis.

1.18 Taxation / Competitive Neutrality

The National Museum of Australia is exempt from all forms of taxation except Fringe Benefits Tax (FBT) and the Goods and Services Tax (GST).

Revenues, expenses and assets are recognised net of GST except:

- where the amount of GST incurred is not recoverable from the Australian Taxation Office; and
- for receivables and payables.

Note 2: Events After the Reporting Period

There are no events after the reporting date that will materially affect the financial statements.

53,900	53,000

No other services were provided by the Auditor-General.

112	NATIONAL MUSEUM OF AUSTRALIA ANNUAL REPORT 09–10

Note 14: Financial Instruments

	2010 \$'000	2009
Note 14A: Categories of Financial Instruments	\$ 000	\$'000
Financial Assets		
Held-to-maturity:		
Term deposits	45,777	47,208
Total	45,777	47,208
Loans and receivables:		17,200
Cash and cash equivalents	2,246	1,488
Receivables for goods and services	368	160
Interest receivable	632	1,367
Other Receivables	205	-
Total	3,451	3,015
		- /
Carrying amount of financial assets	49,228	50,223
Financial Liabilities		
At amortised cost:		
Supplier payables	2,125	2,199
Total	2,125	2,199
Carrying amount of financial liabilities	2,125	2,199
Note 14B: Net Income and Expense from Financial Assets		
Held-to-maturity		
Interest revenue	2,525	3,564
Net gain held-to-maturity	2,525	3,564
Loans and receivables		
Interest revenue	138	206
Net gain loans and receivables	138	206
Net gain from financial assets	2,663	3,770

The net income/expense from financial assets not at fair value from profit and loss is \$2,663,000 (2008-09 \$3,770,000).

Note 14C: Fair Value of Financial Instruments

The carrying amount of the financial instruments approximate their fair values.

Note 14D: Credit Risk

The National Museum of Australia is exposed to minimal credit risk as the majority of loans and receivables and held-to-maturity are cash deposits held with financial institutions. The maximum exposure to credit risk is the risk that arises from potential default of a trade debtor.

The following table illustrates the Museum's gross exposure to credit risk, excluding any collateral or credit enhancements.

	2010	2009
	\$'000	\$'000
Financial assets		
Cash and cash equivalents	2,246	1,488
Investments	45,777	47,208
Trade and other receivables	1,205	1,527
Total	49,228	50,223

Notes to and forming part of the financial statements

Credit quality of financial instruments not past due or individually determined as impaired					
	Not past due nor impaired	Not past due nor impaired	Past due or impaired	Past due or impaired	
	2010 \$'000	2009 \$'000	2010 \$'000	2009 \$'000	
Cash and cash equivalents	2,246	1,488	-	-	
Investments	45,777	47,208	-	-	
Trade and other receivables	1,060	1,472	145	55	
Total	49,083	50,168	145	55	

The National Museum of Australia has no significant exposures to any concentrations of credit risk and has policies and procedures which outline investment of surplus cash and debt recovery techniques.

The ageing of financial assets that are past due but not impaired is equal to the ageing of receivables and is stated in Note 5B.

Note 14E: Liquidity Risk

The National Museum of Australia's financial liabilities are trade creditors. The exposure to liquidity risk is based on the probability that the National Museum of Australia will encounter difficulty in meeting its obligations associated with financial liabilities. This risk is minimal due to government funding and continuous monitoring of cashflows.

Maturities for financial liabilities 2010

	On	within 1	1 to 2	2 to 5	> 5	
	demand	year	years	years	years	Total
	\$'000	\$'000	\$'000	\$'000	\$'000	\$'000
Supplier payables	2,125	-	-	-	-	2,125
Total	2,125	-	-	-	-	2,125

Maturities for financial liabilities 2009

	On	within 1	1 to 2	2 to 5	> 5	
	demand	year	years	years	years	Total
	\$'000	\$'000	\$'000	\$'000	\$'000	\$'000
Supplier payables	2,199	-	-	-	-	2,199
Total	2,199	-	-	-	-	2,199

The Museum has no derivative financial liabilities in both the current and prior year.

Note 14F: Market Risk

The table below details the interest rate sensitivity analysis of the Museum at the reporting date holding other variables constant. A 150 basis point change is deemed to be reasonably possible and is used when reporting interest risk.

Sensitivity analysis of the risk that the Museum is exposed to for 2010

		Change in	Effect on	
	Risk variable	risk variable %	Profit and loss \$'000	Equity \$'000
Interest rate risk	Interest	1.5	687	687
Sancitivity analysis of the risk that	the Museum is exposed to for 2000	1		
Sensitivity analysis of the risk that	the Museum is exposed to for 2009		Effector	
Sensitivity analysis of the risk that	1	Change in	Effect on Profit and	
Sensitivity analysis of the risk that	the Museum is exposed to for 2009 Risk variable		Effect on Profit and loss	Equity
Sensitivity analysis of the risk that	1	Change in risk	Profit and	Equity \$'000

The method used to arrive at the possible change of 150 basis points was based on cash rate for the past five years issued by the Reserve Bank of Australia (RBA) as the underlying dataset. This information is then revised and adjusted for reasonableness under the current economic circumstances.

Note 15: Compensation and Debt Relief

No waiver of amounts owing to the Museum were made during the reporting period. (2009: nil)

Note 16: Assets Held in the National Museum of Australia Fund

Purpose - the Fund, set up under section 34 of the *National Museum of Australia Act 1980*, is for the receipt of gifts and bequests (otherwise than on trust) of monies, or monies received from the disposal of property given, devised, bequeathed or assigned to the Museum. These monies are recognised in the financial statements.

	2010 \$'000	2009 \$'000
Total amount held at the beginning of the reporting period	-	-
Receipts	86	10
Payments Total amount held at the end of the reporting period	(86)	(10)
i otal amount new at the end of the reporting period	·	-

Note 17: Reporting of Outcomes

The Museum has a single Outcome which is reported in Note 1.1.

Net Cost of Outcome 1 Delivery

	Outcome	
	2010	2009
	\$'000	\$'000
Expenses	49,590	47,775
Income from non-government sector		
Other	6,260	7,472
Total	6,260	7,472
Other own-source income	902	32
Net cost/(contribution) of outcome delivery	42,428	40,271

Net costs shown include intra-government costs that are eliminated in calculating the actual Budget Outcome.
